

## Quick Start Rental Program

Everything you need including Web hosting to start live Webcasting in less than 30 minutes from all types of video sources. Package includes:

- Your choice of Minicaster: SD, SD-SDI, HD
- Automated setup scripts
- Free sample website code
- Live telephone support to help you get started
- Includes 10,000 viewer-hours of live or on-demand streaming

## Features and Applications

- Live Webcasting for Concerts, Sports, News, Conferences and many other real-time applications
- Supports H.264 Adobe Flash® and Windows Media® live and on-demand streaming
- Supplied publishing point allows video to be incorporated into any new or existing website
- Hosting management tools and reports provide details on each viewer and overall system performance
- Optional software tools support video overlays, live source switching, chroma-key and VC-1 encoding
- Works with many different reflecting servers and Content Distribution Networks (CDNs) to allow live, simultaneous stream viewing by hundreds or millions of Internet users.

Minicaster™ is a self-contained, live video streaming system that includes all of the hardware and software needed to produce live Webcasts from all types of video cameras and audio sources, including FireWire®. Built-in video capture and compression modules support stream rates from 100 kbps to 15 Mbps at resolutions up to 1920x1080 and up to 60 fps. Offers live video capture to 1 Tbyte of removable disk storage, built-in DVD-RW drive, Compact Flash slot, dual Gbit Ethernet outputs. All this in a compact 8.5" W, 14" L, 3.5" H (2RU high by ½ rack wide) chassis designed for easy portability.

## Program Details

The Quick Start Rental program is the easiest and least expensive way to get on-line and streaming with high-quality SD or HD video. Customers merely need to supply a video and audio source and a broadband Internet connection – everything else is taken care of. Each Minicaster will automatically connect to the Communtek Tier 1-connected server array, which delivers high-quality streaming to web viewers anywhere in the world.

Video will be delivered through a publishing point that can be used as-is or incorporated into all different types of web pages on any customer server. Example web pages are included.

Each package includes the Minicaster, a high-performance, portable, stand-alone system for live HD and SD video webcasting. Featuring H.264 and VP6 Adobe Flash® and Windows Media® encoding, the Minicaster can produce streams at bit rates from 100 kbps to 15 Mbps to deliver premium performance for resolutions up to 1920x1280 and frames rates up to 60 fps.

As an added incentive, fifty percent of all payments made under this program will be credited to the customer towards the purchase price of their Minicaster.

### Three Versions Available:

**Minicaster** – High-quality compression for analog video sources, including NTSC, PAL and S-Video inputs. Supports two channels of unbalanced analog audio.

**Minicaster SDI** – Adds Standard definition serial digital inputs (SD-SDI) and up to four channels of embedded audio.

**Minicaster HD** – Replaces analog video inputs with HD-SDI input that supports up to eight channels of embedded audio.

All three versions also feature Firewire video/audio input and Gigabit Ethernet output.

Quick Start Package Pricing	60 Day Initial Period	Each Month Thereafter
Minicaster Quick Start	<b>\$2,500</b>	<b>\$500</b>
Minicaster-SDI Quick Start	\$3,000	\$650
Minicaster-HD Quick Start	\$3,750	\$900
Included Stream Hosting*	10,000 hrs.	5,000 hrs.

\*Included Stream Hosting is at 350 kbps, suitable for SD video. 60-day package includes 10 hours live or VoD streaming to 1,000 viewers or 30 minutes to 20,000 viewers or any product of viewers and stream durations totaling 10,000 hours. HD video will require higher bandwidths, thereby reducing total number of hours included. Additional blocks of hosting time can be quoted on request.
